

CAPABILITIES GUIDE

Clear sound. Clean setup. Right-sized event support.

Audio and event-production support for ceremonies, presentations, meetings, private events and venue overflow.

RIGHT-SIZE FIRST Equipment is recommended only after the room, guest count, program, venue rules, power, access and operator needs are confirmed.

Core capability areas

Event sound systems Powered speakers, subwoofers, stands, mixers and playback connections configured for the room and program.	Wireless microphones Handheld and lapel options for ceremonies, speeches, panels, presentations and announcements.
DJ + playback systems Professional music playback, DJ control, monitoring and guest-area sound for private and corporate events.	Lighting support Dance-floor lighting, uplighting and simple event-enhancement options when included in the confirmed scope.
Delivery + setup Scheduled delivery, professional placement, cable management, testing and strike.	On-site operation Sound check, microphone support and event operation available when staffing is included in the quote.

Typical applications

Social + venue events • Wedding ceremonies and speeches • Cocktail hours and receptions • Fundraisers, galas and school dances • Private parties and venue open houses	Business + presentation events • Meetings and company celebrations • Panels and presentations • Holiday parties and award programs • Backup or supplemental venue audio

AV PLANNING WORKSHEET

Information needed for an accurate quote

Event details

- Date, venue and exact room/location
- Guest count and room layout
- Program start/end and access window
- Indoor, outdoor or weather-dependent use
- DJ, speech, presentation or mixed program

Technical details

- Number and type of microphones
- Playback and presentation connections
- Existing venue sound or required integration
- Available power and cable routes
- Operator, delivery-only or full-service need

Operating standards

Venue coordination

Load-in, parking, elevators, access, power, sound limits, curfew and strike are confirmed in advance.

Safety + presentation

Equipment placement and cable routing must protect guests, staff, exits and service paths.

Outdoor events

Weather cover, stable power and a documented weather decision are required.

Rental responsibility

Possession, supervision, loss, damage, late return and prohibited-use terms belong in the signed agreement.

Professional playback + event sound

Corporate and brand-ready presentation

IMPORTANT A final capabilities sheet should list only equipment actually owned or reliably sourced, including verified quantities and model numbers. Do not promise dry-hire rentals, rigging, generators or large-format production unless they are operationally supported.
